Rewards

Recognition Orders must be created so the Girl Scouts receive all of their earned recognitions based on sales and booth credit. Your council may have an early recognition, main recognition plan and troop recognition plan. Refer to your council’s instructions on what types of plans are available. Based on council recognition program the council may set up individual girl programs.

Recognition Order

Troops must create the recognition order on or before the council published due date for recognitions. The order will automatically assign each girl the earned recognitions once the order is created. Once an order is created, the troop can go back through “Manage Recognition Orders” to edit the order.

- Navigate to Rewards>Create Reward Order
- Select the Order Type – available type will depend on council set up and dates.

- Once you select the order, the system will generate the recognition order.
- If a red triangle appears on any row, action is required to complete the order. The actions are either a choice between multiple items or sizes for apparel.

- Click the down arrow on the level indicated and complete the choice or size.

- Click on the button to select which recognition the Girl Scout would like or the correct size for apparel items.
- Once all selections are complete, the '!' icon disappears.
- Click Save to finalize this Girl Scout’s recognitions and then click the Recognition Order button on the top-left of the page to return to troop listing

- Any girl recognition orders marked unread do not have to be opened to save or submit the order.

- Promising practice is to wait to create the recognition order until after all transfers to girls are complete. If the order is created earlier and additional transfers are made, the order will update to award the girl(s) any additional recognitions. This may trigger a need to review needed action items.

Manage Recognition Orders

Once an order is created and saved, any changes must be managed through the Manage Orders page. Navigate to Reward>Manage Recognition Orders
